COMPANY OVERVIEW

Abhisure Solutions.

Abhisure Solutions is the IT and digital services arm of Blue Orbit Group — delivering web & mobile app development, cloud infrastructure, cybersecurity, data & AI, and digital transformation services to clients across India, applying the same standards of governance and long-term client relationships the Group has built since 1998.

WHO WE ARE

Technology, delivered with the Group's discipline.

Abhisure Solutions was registered on 12 June 2017 to bring focused IT and digital capability into Blue Orbit Group's operating portfolio — covering web and mobile application development, cloud infrastructure, cybersecurity, data and AI, and broader digital transformation work for clients across India. Our service lines are shaped around both current best practice and where technology demand is headed — from everyday web and app delivery through to cloud, data and AI-driven work — so clients have a single technology partner as their needs grow.

VISION

To be a trusted technology partner for clients across India, known for keeping pace with current tools and emerging demand alike.

MISSION

Reliable, Well-Engineered Delivery

Deliver reliable, well-engineered software and digital services.

Current With Modern Practice

Stay current with modern tools, cloud platforms and security practice.

Built Toward Emerging Demand

Build toward emerging demand — AI, automation and data-driven decision-making.

Group Standards, Every Project

Apply the Group's standards of governance and client care to every project.

WHAT WE DO

Technology Capability.

Web & Mobile App Development

Modern web frameworks, iOS & Android, and cross-platform development — MVP through to scalable, production-grade applications.

Cloud Infrastructure

Major cloud platforms, containers, and CI/CD — architecture sized to grow with the business rather than over-built from day one.

Data, Analytics & AI

Data pipelines, dashboards, and applied machine learning for process automation and decision-support.

Cybersecurity

Security assessments, hardening, and ongoing monitoring for organizations handling sensitive data.

Enterprise Systems

ERP/CRM integration and modernization guidance for organizations running on ageing, disconnected systems.

Product Design

User research through to interface design, grounding technical work in how people actually use the product.

ENGAGEMENT MODELS

How we structure a project.

Three common ways clients work with us — the right fit depends on scope clarity and how long the relationship is expected to run.

01 Fixed-Scope Projects

A defined deliverable, timeline and price — best when requirements are clear upfront.

02 Time & Material

Flexible scope with billing based on actual effort — suited to evolving or exploratory work.

03 Dedicated Team / Retainer

An ongoing team or support arrangement for continuous product development or maintenance.

WHO WE WORK WITH

Startups & Early-Stage Businesses

Small & Medium Enterprises

Established Organizations

INDUSTRIES WE SERVE

Built for the sector, not just the brief.

Startups & Early-Stage Businesses

MVP development, scalable architecture and cloud infrastructure sized to grow with the business rather than over-built from day one.

Manufacturing & Industrial

Digital transformation, plant data dashboards and legacy system modernization — bridging shop-floor data into usable dashboards.

Healthcare & Financial Services

Secure, compliant application development with the access-control and audit-trail standards patient and financial data require.

Retail, Real Estate, Education & Logistics

Inventory-integrated platforms, client-facing portals, learning platforms, and supply-chain tracking, each built for that sector's specific demand pattern.
